

Product Grade

Description

ANTI-SEIZE COMPOUND, NLGI 1 GRADE: 3101

- Conforms to Mil-T-5544C.
- Best suited for austenitic stainless steel, titanium, nickel and cobalt alloys and similar corrosion resistant metals and alloys.
- Electrically conductive and useful for spark plug threads.
- **Serviceable Temperature:** -30°C to 482°C
- **Pack Size:** 1 & 21 Kg

ANTI-SEIZE COMPOUND, NLGI 2 GRADE: 3030

- Contains copper for extreme heat and pressure (>3000psi).
- Can be used as a tapping compound. Complies with M1L-A-907D specifications
- **Serviceable Temperature:** -30°C to 482°C
- **Pack Size:** 1 & 21 Kg
