

INDUSTRIAL LUBRICANTS

Product Name

Description

ADHESIVE GREASE SPRAY

- **Aerol® Adhesive Grease Spray** is a useful and handy service aid, which contains a modified, high performance grease and PTFE, in a spray can.
- The Grease sprays out like an oil but stick to the substrate like a grease without flowing off.
- The grease is resistant to high temperature (160°C), outdoor weather condition and water washout.

Applications:

- It is especially useful for lubricating such components and assemblies that are subject to sudden movement after being stationary/inactive for long period of time.
- Lubrication of inaccessible parts & assemblies of machinery and automobiles.

Packing:

24 cans in one corrugated carton

Grade	Properties/Type	Net Contents
7000	Cream/Off-white grease	250g

Product Name

Description

MOLY SPRAY

- **Aerol® Moly Sprays** are lubricating preparations that spray out as an oil, paste or dry powder, depending on the grade.
- This oil, paste or powder coating of Molysulphide forms a film of solid lubricant which bonds on to most metal surfaces, providing a coating which is capable of various outstanding features such as high load resistance, wear resistance, high temperature resistance, low volatility, minimal dust attraction, non-drip, non-melt and seizure resistant coating.

Applications:

They are commonly used to prevent seizure in threaded connections, as a wear, load and high temperature resistant lubricant for machinery and parts and as an assembly aid for tight fitting components.

Packing:

24 cans in one corrugated carton

Grade	Properties/Type	Net Contents
0606	Dry powder type coating	300g
0505	Oil type coating	300g
2010	Paint type coating	300g
6066	Paint type, dry, bonded film coating	300g

Product Name

Description

CHAIN OIL SPRAY

- **Aerol® Chain Oil Sprays** are based on synthetic fluids designed to lubricate chains operating in conditions of high temperature, high load, moisture and corrosive environments.
- They significantly extend the service life of the chains operating in food processing factories.

Applications:

They are commonly used on chains operating in ovens and furnaces such as glass plants, plywood industry, automobile paint shops etc. They are also used for lubrication of chains in cards and bikes.

Packing:

24 cans in one corrugated carton

Grade	Properties/Type	Net Contents
4011	Serviceable from -30°C to 200°C Toxic in food related applications.	300g
4021	Serviceable from -30°C to 200°C Suitable for heavily loaded chains	300g
4031	Adhesive chain lubricant	300g

Product Name

Description

SILICONE SPRAY

- **Aerol® Silicone Spray** is a pressurized solution of Silicone Fluids.
- It acts as a non-toxic, non-staining, non-carbonizing and high and low temperature resistant lubricant

Applications:

Commonly used on delicate machines, components, sensitive plastic, rubber articles and components. They can also be used as release agents in several applications.

Packing:

24 cans in one corrugated carton

Grade	Properties/Type	Net Contents
0070	Clear, transparent, oily film with minimum dust attraction	250g
0075	Silicone Grease in a spray can	250g

Product Name

Description

ANTI-SEIZE SPRAY

- **Aerol® Anti-Seize Spray** is a special purpose lubricant that prevents galling and seizure of threaded fasteners and connections exposed to high temperature or corrosive atmospheres.

Applications:

- Used in preventing seizure of bearings, gears, piston rings, cams, valve stems, ball joints, splines, nuts & bolts, screw threads, turbine studs, valves & cocks, press fittings, brake components, plugs & seals.
- Often used to reduce friction and wear on assembly press-fits and during start-up.
- Also used in threaded connections to ensure proper tightening torque, aid non-destructive disassembly and reduce connection failure in services.

Packing:

24 cans in one corrugated carton

Grade	Properties/Type	Net Contents
3101	Black paste, -30°C to 482°C	250g
3030	Copper Paste, -30°C to 982°C	250g

Product Name

Description

DRY FILM PTFE SPRAY

- **Aerol® Dry Film PTFE Spray** is a lubricating preparation that deposits a dry film of poly tetrafluroethylene on the substrate.
- This film has exceptional bonding to most metal, non-metal surfaces and is unaffected by water, chemical weather.
- This lubricant film is serviceable from - 200° to 250°C.

Applications:

- It is used where oil, grease are not tolerated.
Eg. Lubrication of food packing machines.
- It is also used as a mold release agent in several types of molding operations.

Packing:

24 cans in one corrugated carton

Grade	Properties/Type	Net Contents
7701	Dry film lubricant	300g

INDUSTRIAL LUBRICANTS

Product Name

Description

GRAPHITE DRY LUBE SPRAY

- **Aerol® Graphite Dry Lube Spray** is a dry film bonded lubricant.
- The coating is air drying in nature and bonds well to metal, rubber, plastic and most substrates to form a smooth black paint like coating that lubricates and protects the surfaces from extreme pressure and friction wear.
- The Dry Graphite Lube coating withstands temperatures up to 450°C.

Applications:

- Recommended as a general maintenance lubricant on gaskets, transfer belts and conveyor belts;
- As an assembly lube on motors, plant machinery and handling equipment; and as a general lubricant for high temperature, load resistant, anti-wear coating on machine components, slides, rollers, wheels, gears, chains and hoists.
- Also used as a release agent during the moulding process of diamond segments of cutting tools and several other casting and molding applications.
- Ideal for applications where oil and grease based lubricants are not recommended.

Packing:

24 cans in one corrugated carton

Grade	Properties/Type	Net Contents
2012	Air Drying, bonded film coating	450g

Product Name

Description

TREADMILL LUBRICANT SPRAY

- **Aerol® Sports Treadmill Lubricant Spray** prevents the wear and tear of treadmill belts and keep it in good condition.
- It is free from Chlorinated solvents that effect rubber and is highly adhesive to both belt and deck which ensures longer lubricant life.
- It keeps rubber belts soft and supple and dDoes not over lubricate that causes 'slip' in belt or does not creep or flow out of belt.

Applications:

Used basically for treadmill belts.

Packing:

24 cans in one corrugated carton

Grade	Properties/Type	Net Contents
0074	Highly adhesive, transparent, non-staining lubricant	250g
